

linear equations in two variables

Across

- 6.** A numerical or constant quantity placed before and multiplying the variable in an algebraic expression.
- 7.** If the lines on a graph intersects, then the graph is _____.
- 8.** In mathematics, a statement of an equality containing one or more variables. Solving consists of determining which values of the variables make the equality true.
- 9.** Number of solutions if the lines a parallel
- 10.** Graph of quadratic equation is a "U" shaped curved

Down

- 1.** Set of two or more equations
- 2.** Equal in value , amount or function
- 3.** Means of solving a problem
- 4.** Having no boundaries or limits ; impossible to measure
- 5.** Data doesn't form a straight line when graphed
